Mission Statement

***“Do not follow where
the path may lead.
Go instead where
there is no path and
leave a trail”***

-Muriel Strode

For Pacific AgPak this is realized through our vision of the entire produce industry. By listening to the needs of the marketplace we have, from the beginning, worked toward providing the best in packaging possibilities.

Who knew that from chipboard, domes and plastic pints we would be here today with a complete line of agricultural packaging? Pacific AgPak did-because we listened.

Listening to our customers led us to be the first to improve clamshell features and secure product by developing our button-lock system. Listening to the marketplace led us to develop the 4 Pound clamshell. To assist growers and shippers we produced the first ever “Clamshell Packaging Manual”. Today we are again the pioneers in our development of the Freight Buster & Quick Cool clamshell lines.

So when you look for a source of knowledge in packaging - follow the trail blazed by Pacific AgPak.

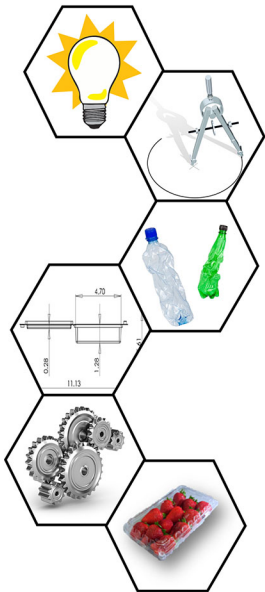

David Baum
President

Developing the Foundations

A Timeline of Pacific AgPak's History

- 1992** Pacific AgPak opens with 2 Staff members
Products offered: Chipboard and Domes
- 1993** Transition to Pacific AgPak Clamshells begins
- 1994** 1 Pound Clamshell becomes the first Shining Star in a new series
- 1995** Oxnard Office
- 1996** Launch of 2 Pound Clamshell
- 1997** Transition to Pacific AgPak Clamshells begins
- 2000** Pacific AgPak offers the Button-Lock Clamshells, now offering better protection
- 2001** Pacific AgPak pioneers the now widely used 4 Pound Clamshell
- 2002** Once again, Pacific AgPak is the first to launch Modular Clamshells- they fit in noth Common footprint and RPC:
The 1/2 Pint, 1 Pint, 1 Pound and 2 Pound...
Exclusively from Pacific AgPak
- 2012** High Cube Freight Buster Clamshell is Developed
- 2014** Pacific AgPak becomes the first company to debut 11 Different Specialty Mushroom Trays made from Recycled PET
- 2015** 1 Pound Quick Cool Clamshell is Developed to help decrease cooling times

Imagination Leads to Invention

The Development of a superior product that advances an industry starts with strong imagination, thorough development, and Pacific AgPak expertise.

The First step is to identify the specific needs of our customers to provide the best for shipping product. We then create a sketch of the new clamshell, work on the best placement of ventilation, move to blueprints and finally to prototypes. From there, the hands-on development and research begins.

Strong relationships with top growers and shippers, heads of the retail chains and industry support leaders have been the key to success in producing new and innovative packaging options for the entire agricultural industry.

Every clamshell is considered a unique challenge. Through the imagination of the Pacific AgPak staff, new clamshells have been developed and produced every year since 1992.

Strawberry Clamshells

6 Down Format

PAK- 1lb. Standard Smooth Wall Clamshell

480 Units per Case
36 Cases per Pallet
7 1/4" x 4 3/4" x 3 1/2"
